Description of Change to the Customer:

Solidigm is issuing this PCN revision to notify customers of an update to the scope of the previously released Product Change Notification for the D7-PS1010 and D7-PS1030 product lines.

The Component Multi-Sourcing changes outlined in the original PCN will proceed as planned and remain unaffected. Please reference the table below for the full list of new components being introduced to the product, which also remains unchanged from the original PCN.

However, Solidigm has made the decision to decouple the Maintenance Release 2 (MR2) firmware factory cut-in from this PCN. **The MR2 firmware will NOT be introduced into factory production as part of this change.** Solidigm will continue to ship drives from the factory with MR1 (G70YG150 for U.2 and G75YG150 for E3.S) until further notice.

Customers are not required to take any action at this time. Please reach out to your Solidigm sales representative if you have any questions or concerns.
